

Technical Delivery Partner for Digital Agencies

"You sell. We build. You own the client relationship."

Xaevora is an independent technology delivery partner providing custom software engineering, AI agent architectures, and high-performance web applications. We serve primarily as the white-label engineering engine behind international digital marketing, creative, and consulting agencies.

COMPANY INFORMATION

Corporate Overview

- **Entity:** Xaevora
- **Founder & Lead:** Anand
- **Established:** 2025
- **Primary Website:** <https://xaevora.com>
- **Partner Inquiries:** partners@xaevora.com

Coverage & Operations

- **Core Focus:** White-Label Technical Delivery
- **Target Markets:** US, UK, UAE, Australia, Canada
- **Timezone Overlap:** 4+ hours daily with US/UK/UAE
- **Communication:** Dedicated Slack, Zoom, Email

CORE TECHNICAL CAPABILITIES

1. Custom Web Applications & SaaS

Full-stack architectures built with React 19, Next.js 16, Vite, Node.js, and Express. Robust database design on PostgreSQL and MongoDB with strict role-based access control.

2. Applied Artificial Intelligence & RAG

Enterprise knowledge bases powered by Qdrant Vector DB, semantic embeddings, and LLM reasoning (Claude/OpenAI). OCR pipelines parsing unstructured invoices and contracts into structured JSON.

3. Systems & API Integrations

Bi-directional data sync connecting HubSpot, Salesforce, Stripe, ERPs, and custom databases using Redis and Upstash background job queues.

4. Continuous Retainers & Maintenance

Ongoing SLAs, proactive security patching, 99.9% uptime monitoring, CI/CD pipeline management, and monthly feature iteration sprints.

QUALITY ASSURANCE & GOVERNANCE PROTOCOLS

To ensure partner agencies never face embarrassment before clients, all deliverables adhere to strict engineering governance:

Strict Static Typing & Linting

100% strict TypeScript with zero 'any' escapes. Enforced ESLint standards, Zod schema validation across all inputs, and modular code architecture.

Security & OWASP Compliance

Parameterized SQL queries, secure JWT token rotation, encrypted environment secret handling, and defense against OWASP top-10 vulnerabilities.

Automated CI/CD Staging

Every pull request deploys to an isolated staging environment for agency preview and client walkthrough before production deployment.

30-Day Bug Fix Warranty

Every delivered Statement of Work includes a comprehensive 30-day post-launch warranty rectifying any verified defect at zero cost.

COMMERCIAL PARTNERSHIP MODELS

Model A: White-Label Delivery (Agency Captures 30% – 45%+ Margin)

Xaevora operates as your silent internal engineering squad. We provide fixed wholesale milestone pricing. Your agency bills the client retail at your chosen markup. All IP transfers to you.

Model B: Co-Selling & Technical Lead (15% – 25% Revenue Share)

For complex enterprise AI or custom web applications, Xaevora joins prospective client discovery meetings as your specialist Engineering Director to scope, diagram, and close high-value scopes.

Model C: Strategic Referral (10% – 15% Recurring Commission)

Introduce a qualified client requiring software beyond your remit. Xaevora handles end-to-end scoping, contracting, and delivery, wiring your commission as client payments clear.
